EXPERIENCE	<p><b>Fellow, Insight Data Science</b>, Mountain View, CA Aug. - Oct. 2013</p> <ul style="list-style-type: none"><li>▷ Created <i>Delay Me Not!</i>, a flight delay predictor providing ticket purchasing advice.</li><li>▷ Analyzed 16GB of flight data (150 million domestic flights from 1987 to 2013).</li><li>▷ Applied a variety of machine learning algorithms (linear and logistic regression, generalized linear models, Gaussian processes) using Python's numpy, scipy, pandas, and scikit-learn packages to model flight delay predictions.</li><li>▷ Designed an interactive web frontend, utilizing Flask, Twitter Bootstrap, and javascript, featuring live MySQL database queries. Hosted on Amazon S3.</li></ul> <p><b>Research Fellow, UC Berkeley</b>, Berkeley, CA 2009 - 2013</p> <p><b>Postdoctoral Member, Institute for Advanced Study</b>, Princeton, NJ 2006 - 2009</p> <ul style="list-style-type: none"><li>▷ Performed large-scale numerical N-body simulations (on 1000's of cores on NASA's <i>Pleiades</i> and NCCS's <i>Jaguar</i> supercomputers) of the formation of a Milky-Way-analog galaxy. (The VIA LACTEA II simulation was featured in the Department Of Energy's OASCR <i>Breakthroughs 2008</i> report on Recent Significant Advancements in Computational Science.)</li><li>▷ Analyzed and visualized 20TB of numerical simulation data consisting of billions of particles per output.</li><li>▷ Studied the formation of dwarf galaxies utilizing state-of-the-art cosmological adaptive mesh refinement (AMR) hydrodynamics simulations.</li><li>▷ Developed C and Python codes (often MPI-parallelized) for numerical data analysis and visualization.</li><li>▷ Contributed to the development of the <i>Enzo</i> cosmological hydrodynamics community code (enzo-project.org) written in C++ and Fortran, and the <i>yt Project</i> (yt-project.org), an astrophysics data analysis and visualization package for Python.</li><li>▷ Published 41 papers (18 first author) in peer reviewed journals (including Nature and Science), which together have received more than 2,500 citations.</li></ul>	
SKILLS	<p><b>Languages:</b> Python, C, Fortran, MySQL, bash, HTML/CSS, L<sup>A</sup>T<sub>E</sub>X, C++ (some experience), javascript (some exp.)</p> <p><b>Tools:</b> git, hg, numpy, scipy, pandas, scikit-learn, matplotlib, mpi4py, IPython notebook, HDF5, Flask, Twitter Bootstrap, d3.js (some exp.)</p> <p><b>Other:</b> Linux (10+ years), numerical simulation (N-body and AMR CFD), numerical methods, parallel computation (MPI), visualization, machine learning and classification (some exp.)</p>	
EDUCATION	<p><b>University of California at Santa Cruz</b>, Santa Cruz, California <i>Ph.D., Astronomy &amp; Astrophysics, "Adventures in Numerical Astrophysics", June 2006</i></p> <p><b>California Institute of Technology</b>, Pasadena, California <i>B.S., Physics, June 2000</i></p>	
HONORS AND AWARDS	<ul style="list-style-type: none"><li>▷ Whitford Prize, UC Santa Cruz, 2002</li><li>▷ Caltech, graduated with honors, 2000</li><li>▷ Caltech Carnation Prize for Academic Merit, 1998</li></ul>	
PUBLIC TALKS	<ul style="list-style-type: none"><li>▷ Mt. Tamalpais State Park Astronomy Program (co-sponsored by Bay Area Wonderfest) "Dark Matter, Dark Skies, Bright Minds", June 2012</li><li>▷ SF Amateur Astronomers, "The Milky Way as a Dark Matter Laboratory", May 2012</li><li>▷ "What Physicists Do" lecture series at Sonoma State University, October 4, 2010</li></ul>
